Portfolio Analysis and Investment Planning: **Register for a Free Trial**

Model Allocation and Performance Analysis

Access, Analyze and Compare Models.

Blend Model Allocations and Historical Model Performance and create "Models of Models."

- Historical Allocation Change and Trade Support
- Mutual Fund, ETF, Closed End Fund, Stock, SMA, Bond Variable Annuity and Index Data

Build your own Custom Model Allocations using AdvisoryWorld's investment screening and portfolio optimization tools.

Integrated with the Veo® Platform from TD Ameritrade Institutional

Seamlessly Import Client, Account and Positional Data. Compare your own Custom Model Allocations vs. a Client or Prospect Account Allocation with the CompariScan Proposal.

Customizable Research Reports & Proposals

Generate Portfolio & Investment Analytics including Hypothetical vs. Actual Performance based Risk vs. Return and MPT statistics such as Alpha, Beta, R², Sharpe Ratio, Up and Down Market Capture, Information Ratio and more.

Review asset allocation and correlation for diversification insight as well as equity and fixed income metrics for indications as to growth vs. value tilt and interest rate exposure.

Differentiate your offering with advanced analytics such as Returns Based Style Analysis and Performance Attribution. Further determine whether investor goals will be reached using Monte Carlo Simulation.
